Colin Newell	17 June 2009	Original

Dataset name	HSE6 (2009) Individuals
Description	<p>Household and Socio-Economic Survey, Round 6 (HSE6) was carried out during the first half of 2009, as part of DS Round 20 of the AC household surveillance. As it is defined as occurring during <i>DSRound 20</i> variable <i>DSRound</i> in this dataset is a constant 20.</p> <p>The survey was virtually identical to that administered in HSE5, with the exception of an added 'refusal' question at the start, so this documentation is virtually identical. It is much shorter than in HSE 3 and HSE4 in an attempt to improve response and data quality.</p> <p>All households with a current Residency in a Bounded Structure are eligible for the HSE questionnaires.</p> <p>Note that the questionnaire is part of household surveillance, and thus will normally be answered by a senior household member. Thus it is perfectly possible for the individual HSE record to be completed for individuals who have outmigrated or are already dead at the time the questionnaire is administered.</p>
Rows/Units of analysis	Individuals
Unique identifier(s)	<i>lIntId + BSIntId</i> (However there are currently approx 250 pairs where this rule is broken. It may be that individuals are members of two or more Households in same Bounded Structure, or simply that the same
